

A handbook that was missing from the bibliography of the Hellenic Air Force admirers. An essay by Themistoklis Vranas who has collected information about all the out of service aircrafts of Hellenic Air Force is presented to you after 22 years of research and 18 months of process. This book is the first of its kind and the world's most comprehensive presentation of out of service aircrafts in a specific Air Force. It combines a full photographic record of every aircraft (667 aircrafts in total or the case of the Hellenic Air Force! ) and a detailed description of its route after retirement from active service! The book is softcovered with 152 pages and you can find more information by visiting the Special Projects official web-site [here](#) or just by clicking the image above.
